

Cognition Therapeutics Latest Episode of “Conversations” Podcast Features Biomarker Experts from Gothenburg University, Emory and Amsterdam UMC

May 23, 2023

PURCHASE, N.Y., May 23, 2023 (GLOBE NEWSWIRE) -- [Cognition Therapeutics, Inc.](#) (Nasdaq: CGTX), (the “Company” or “Cognition”) has released its fifth “Conversations” video podcast, a review and interactive discussion of Cognition’s CT1812 biomarker results presented at AD/PD™ 2023, the Alzheimer’s & Parkinson’s Diseases Conference. Cognition VP of research, [Mary Hamby, PhD](#) presents findings from an unbiased proteomic analysis of combined datasets from the first cohort of the Phase 2 SHINE study and the completed Phase 1b SPARC study, both conducted in mild-to-moderate Alzheimer’s disease patients and similarly treated with either CT1812 or placebo.

This meta-analysis revealed that CT1812 treatment was associated with statistically significant changes in biomarkers associated with:

- synaptic function,
- amyloid biology,
- and neuroinflammation.

Importantly, these changes in key biomarkers were replicated across studies, and had similar directionality and degree of change.

In this conversation, Dr. Charlotte Teunissen moderates a discussion on interpretation of these findings and their relevance to the CT1812 mechanism of action with two leading experts in biomarker development.

[Episode 5](#): “Exploring the Effects of CT1812 on Alzheimer’s Disease Processes: Proteomics and Pathways of Neurodegeneration” features:

- Charlotte Teunissen, PhD - Professor of Clinical Neurochemistry at Amsterdam University Medical Center
- Nicholas Seyfried, PhD - Professor of Biochemistry and Neurology at Emory University School of Medicine and Director of the Emory Integrated Proteomics Core
- Henrik Zetterberg, MD, PhD - Professor of Neuroscience at Gothenburg University and Group Leader of the UK Dementia Research Institute

Cognition Therapeutics welcomes comments, questions and feedback on this and other Conversations episodes which may be submitted at conversations@cogrx.com. We’d love to hear your thoughts!

About Cognition Therapeutics, Inc.

Cognition Therapeutics, Inc. is a clinical-stage biopharmaceutical company engaged in the discovery and development of innovative, small molecule therapeutics targeting age-related degenerative disorders of the central nervous system and retina. We are currently investigating our lead candidate CT1812 in [clinical programs](#) in Alzheimer’s disease, dementia with Lewy bodies (DLB) and dry age-related macular degeneration (dry AMD). We believe CT1812 and our pipeline of σ -2 receptor modulators can regulate pathways that are impaired in these diseases. We believe that targeting the σ -2 receptor with CT1812 represents a mechanism functionally distinct from other current approaches in clinical development for the treatment of degenerative diseases. More about Cognition Therapeutics and its [pipeline](#) can be found at <https://cogrx.com>

Health Care Disclaimer

If you have or suspect that you have a medical problem or condition, please contact a qualified health care professional immediately.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. All statements contained in this press release, other than statements of historical facts or statements that relate to present facts or current conditions, including but not limited to, statements regarding our product candidates, any expected or implied benefits or results, including that initial clinical results observed with respect to CT1812 will be replicated in later trials and our clinical development plans, including statements regarding our clinical studies of CT1812 and any analyses of the results therefrom, are forward-looking statements. These statements, including statements relating to the timing and expected results of our clinical trials, involve known and unknown risks, uncertainties and other important factors that may cause our actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. In some cases, you can identify forward-looking statements by terms such as “may,” “might,” “will,” “should,” “expect,” “plan,” “aim,” “seek,” “anticipate,” “could,” “intend,” “target,” “project,” “contemplate,” “believe,” “estimate,” “predict,” “forecast,” “potential” or “continue” or the negative of these terms or other similar expressions. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our business, financial condition, and results of operations. These forward-looking statements speak only as of the date of this press release and are subject to a number of risks, uncertainties and assumptions, some of which cannot be predicted or quantified and some of which are beyond our control. Factors that may cause actual results to differ materially from current expectations include, but are not limited to: competition; our ability to secure new (and retain existing) grant funding; our ability to grow and manage growth, maintain relationships with suppliers and retain our management and key employees; our ability to successfully advance our current

and future product candidates through development activities, preclinical studies and clinical trials and costs related thereto; uncertainties inherent in the results of preliminary data and pre-clinical studies being predictive of the results of clinical trials; the timing, scope and likelihood of regulatory filings and approvals, including regulatory approval of our product candidates; changes in applicable laws or regulations; the possibility that we may be adversely affected by other economic, business or competitive factors, including ongoing economic uncertainty; our estimates of expenses and profitability; the evolution of the markets in which we compete; our ability to implement our strategic initiatives and continue to innovate our existing products; our ability to defend our intellectual property; the impact of the COVID-19 pandemic on our business, supply chain and labor force; and the risks and uncertainties described in the "Risk Factors" section of our annual and quarterly reports filed with the Securities & Exchange Commission. These risks are not exhaustive and we face both known and unknown risks. You should not rely on these forward-looking statements as predictions of future events. The events and circumstances reflected in our forward-looking statements may not be achieved or occur, and actual results could differ materially from those projected in the forward-looking statements. Moreover, we operate in a dynamic industry and economy. New risk factors and uncertainties may emerge from time to time, and it is not possible for management to predict all risk factors and uncertainties that we may face. Except as required by applicable law, we do not plan to publicly update or revise any forward-looking statements contained herein, whether as a result of any new information, future events, changed circumstances or otherwise.
